

## PROJECT SOLUTIONS

# Helping to save lives

**You're lying on the operating table having that required operation when all of a sudden, pow..... the power supply goes off. A situation you don't want to contemplate at all, yes? And a situation that you take for granted won't ever happen.**

### The Solution

One of the top hospitals in the country, the Bristol Royal Infirmary (BRI) opted for the reliability, quality and integrity of Hawker Siddeley Switchgear and the Eclipse to ensure that such situations should never happen.

A teaching hospital with close links to Bristol University, the BRI provides acute medicine and surgery, critical care, trauma, orthopaedic and Accident & Emergency services to the population of the southern part of Bristol. It is also the centre for cardio-thoracic services for the southwest region.

With any hospital application it is paramount to have a continuous and uninterruptible power supply. The Eclipse lends itself to such an application with its combination of the performance of the vacuum interrupters with the most advanced switchgear technology in the market today.

### Complete Customer Satisfaction

Hawker Siddeley Switchgear supplied 19 Eclipse panels to the BRI - continuing to build their expert reputation in NHS applications, supplying a number of new hospitals with a continuous and reliable power supply.

For more information on our Eclipse product range please visit our website at [www.hss-ltd.com](http://www.hss-ltd.com).
