

PROJECT SOLUTIONS

The power of renewable energy

PROJECT AT A GLANCE

Product: Eclipse

Customer: Various

Location: Worldwide

Installation: 2010 onwards

We are all aware and conscious of the effect that industry and society are having on our planet. The spiralling cost of resourcing energy today, both financially and environmentally, is very real.

The growth and importance of renewable resources as a source of energy to our global community and the future of our climate is undeniable - clean, inexhaustible and entirely renewable.

THE SOLUTION

Hawker Siddeley Switchgear have supplied over 115 Eclipse panels across various renewable energy projects worldwide. From wind to solar farms, to bio mass, to food waste and hydro power, Hawker Siddeley Switchgear are playing an important part in this emerging energy source.

With its proven, superior reliability and technical innovation, minimal parts and maintenance, environmentally friendly interrupters, all with the simplicity of air insulation in a fixed pattern design, the Eclipse still gives the edge in today's competitive switchgear market, whilst leading the way in environmentally friendly and sustainable switchgear solutions.

Hawker Siddeley Switchgear are very honoured to have been able to, and continue to, work in partnership with a variety of renewable energy providers worldwide, demonstrating our commitment and technological know-how in developing sustainable energy solutions for our future generations.
