

## PROJECT SOLUTIONS

# Celebrating 1000 GVR units in Transylvania

Transylvania in Romania, is home to some of Europe's most mystical and historical myths and fairytales with one of the most iconic images being that of the infamous Bran Castle - Dracula's Castle.

Standing proudly in front of Dracula's Castle is a GVR unit from Hawker Siddeley Switchgear Ltd (HSS), one of 1000 units now installed on the Electrica Transylvania South Network.

### The Solution

This achievement was accomplished through a successful 10 year partnership between HSS and Romanian engineering company, Adrem Invest.

Working closely with Adrem Invest, HSS has enabled Electrica Transylvania South Network to establish a network of strategically positioned GVR reclosers with full

remote control and monitoring, thus meeting the increasing expectations of both their customers and the quality and reliability of their power supply.

The GVR - promoting an overall improved distribution network, whilst reducing operational costs.

### Complete Customer Satisfaction

HSS are proud of the 10 year partnership built with Adrem Invest and look forward to continuing and developing this partnership well into the future.
